**Rating sensitivities:**

The analysis of rating sensitivities could not be carried out due to the full redemption of the Class A and B Notes.

**ESG-criteria:**

CRA generally takes ESG-relevant factors (environmental, social and governance) into account when assessing the rating object. Overall, ESG factors have a less significant impact on the current ratings of the Class A and B Notes. Nevertheless, CRA identifies macroeconomic factors (particularly with regard to potential changes in consumer behaviour) to have a high significant impact. Increased macroeconomic uncertainty and potential market decline due to the coronavirus crisis may have adverse effect on VWL's ABS strategy and future portfolio performance. Governance is relevant to the ratings with respect to counterparty risk, but downgrade collateral and replacement provisions mitigate counterparty risk exposure with respect to the Swap Counterparties and Account Bank. Other individual factors with a potential key rating influence were not identified, and therefore did not affect the final rating.

On the subject of ESG (environment, social and governance), Creditreform Rating AG has published the basic document ("The Impact of ESG Factors on Credit Ratings"), which is available on the homepage under the following link:
