Press Release

Creditreform Rating assigned ratings to German auto lease securitisation VCL 22

Neuss, November 25, 2015

Creditreform Rating has assigned ratings to the Class A and Class B Notes of VCL Multi-Compartment S.A., acting for and on behalf of its Compartment 22 (VCL 22), as follows:

EUR Floating Rate Asset Backed Class A Notes : AAA(sf)

EUR Floating Rate Asset Backed Class B Notes : A+(sf)

The transaction is a securitisation of German auto lease receivables, originated by Volkswagen Leasing GmbH (VWL). To size the credit risk of the portfolio and derive base case assumptions about loss rates and expected recovery performance, Creditreform Rating used data provided by VWL as well as internal data bases. VCL 22 is a static pool and securitises only the finance portion of the leases; residual values are not securitized by the Issuer. A combination of Subordinated Loan, overcollateralization and a cash reserve will provide credit enhancement to the rated Class A Notes (7,87%) and Class B Notes (5,48%).

VWL will credit to the Cash Collateral Account certain amounts which will be available to mitigate commingling risks, trade tax and VAT tax risks, and cover the Issuer's exposure to VWL. VWL established an additional reserve on the Cash Collateral Account which will be available to cover risks related to the repurchase or reduction of lease receivables affected by irregularities in determining type approval CO₂ levels. Downgrade collateral and replacement provisions mitigate counterparty risk exposures with respect to the Swap counterparty and Account Bank. Risks related to the Issuer are limited, the compartment structure being ringfenced and with limited recourse to other creditors of the Issuer.

The CRA Portfolio and Benchmark Analysis showed an overall low portfolio credit risk. Accounting for the potentially negative impacts of VW AG diesel emission manipulations on future portfolio performance, Creditreform Rating decided to maintain an additional conservative margin in its analyses.
